

VOLUME 1 FINAL REPORT

1980 CENSUS OF POPULATION AND HOUSING

BASILAN

REPUBLIC OF THE PHILIPPINES NATIONAL ECONOMIC AND DEVELOPMENT AUTHORITY NATIONAL CENSUS AND STATISTICS OFFICE MANILA

REPUBLIC OF THE PHILIPPINES NATIONAL ECONOMIC AND DEVELOPMENT AUTHORITY

HIS EXCELLENCY PRESIDENT FERDINAND E. MARCOS

Chairman

Honorable VICENTE B. VALDEPEÑAS, JR.

Minister of Economic Planning and Director-General of the Authority

NATIONAL CENSUS AND STATISTICS OFFICE

TITO A. MIJARES

Executive Director & Civil Registrar-General

MARCELO M. ORENSE Assistant Executive Director

FOREWORD

This report is one of a series of provincial reports on the results of the 1980 Census of Population and Housing conducted on May 1, 1980.

Demographic data presented herein consist of population distributions according to age, sex, marital status, highest grade completed and literacy. Other bases as gainful occupation, industry and migration are included likewise.

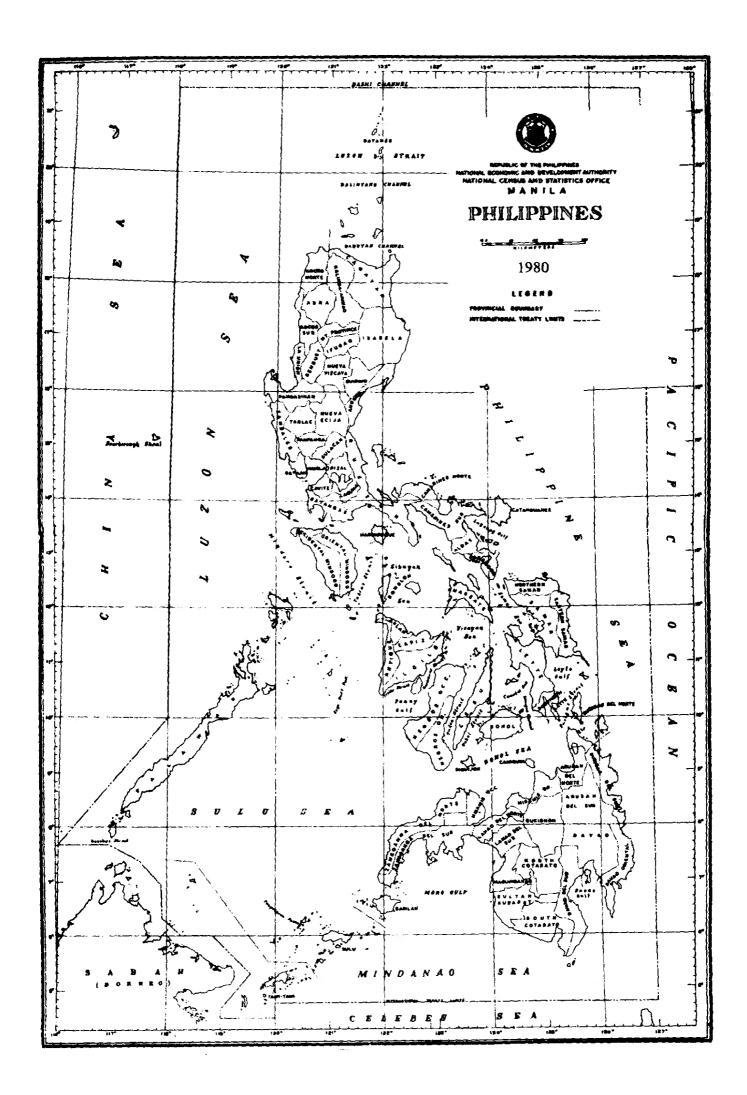

In the other aspect of the census, the following housing characteristics are considered: type of building, structural characteristics, floor area, type of tenure, use and source of water supply, lighting, type of toilet facilities, kind of cooking fuel used and appliances.

Subsequent issues will be the National Summary (Volume II) containing summary data on the final provincial reports and the Special Volume on National Capital Region (Metro Manila Area) which will cover data on the social, economic and demographic characteristics of the region.

Grateful acknowledgment is due the National Census Coordinating Board, government agencies, committees and the local coordinating boards for their invaluable assistance and cooperation.

TITO A. MIJARES

Manila, Philippines May 1983

Explanatory Text

GENERAL

INTRODUCTION

The National Census and Statistics Office conducted in May 1980, the 1980 Census of Population and Housing. This type of Census was also undertaken in May 1970. In May 1975 the Census of Population was taken as Phase I of the 1975 Integrated Census of the Population and Its Economic Activities. This nationwide undertaking was designed to obtain comprehensive data on the size, distribution, structure, change and socio-economic characteristics of the population and to take inventory of the housing accommodations, their geographic location, structural characteristics, available facilities, etc.

The population report contains data gathered from private households as well as collective households, while data on housing were collected from private households only.

It should be emphasized at this point that a complete enumeration of all households throughout the country was made but only sample household questionnaires representing 20 percent of the listed households were processed and the data published in this volume. In so doing, however, the total population count by barangay, male and female, obtained from the listing sheet taken simultaneously during the enumeration was maintained in computing the weights or expansion factors. It should also be noted that data on Tables 1 to 4 of the population tables refer to total population, that is, the population of the private households plus the collective households while Tables 5 to 10 cover exclusively the private household population.

Pursuant to the provision of Batas Pambansa Bilang 72, a final count of the population, by sex at barangay level was submitted to the President and was approved under Proclamation No. 2170 dated March 12, 1982. This report was published separately in 74 provincial volumes.

AUTHORITY FOR THE 1980 CENSUS

Under Commonwealth Act No. 591, the National Census and Statistics Office is authorized "to prepare for and undertake all censuses of population, agriculture, industry and commerce."

It may be mentioned in this regard that sometime in February 1980 Parliamentary Bill No. 809 was presented at the Batasang Pambansa, providing for the taking of an integrated census every ten years beginning 1980, with May 1 of every censal year as the reference date. This bill was approved into Batas Pambansa Bilang 72 on June 11, 1980, more than one month after the start of enumeration.

INTER-AGENCY PARTICIPATION

The expertise and technical advice of the National Economic and Development Authority Inter-Agency Committee on Population and Vital Statistics and its Technical Working Group on 1980 Census of Population and Housing played a vital role in the successful undertaking of the census.

The Committee's main function was to review the questionnaire, methodologies, concept, tabulation and other related aspects of the census in the production of data and development of systems that would produce more reliable and accurate result. It had for its chairman the Dean of the University of the Philippines Population Institute (UPPI) and for its members, one representative each from the Ministries of Human Settlements (MHS), National Defense (MND), Education and Culture (MEC), Health (MOH) and Local

Government and Community Development (MLGCD); the Commission on Population (POPCOM); National Economic and Development Authority (NEDA); and two representatives from the National Census and Statistics Office (NCSO). The Technical Working Group (TWG) for the 1980 Census of Population and Housing was headed by the Chief of the National Census and Household Surveys Department of NCSO and the members were representatives from the MHS, EPRS-NEDA, SCO-NEDA, POPCOM, UPPI, MOH, MEC, and the National Housing Authority (NHA).

Recommendations were likewise solicited from other government agencies for questions that should possibly be included in the population and housing portions in order to fill their data needs.

As early as August 1977, an NCSO Technical Committee for censuses was created. Ranking officials of the National Census and Statistics Office comprised the committee, with the Assistant Executive Director as Chairman, the Chief of the National Census and Household Surveys Department (NCHSD) as Vice-Chairman and Heads of six other departments and staff offices as members.

The committee coordinated with the Inter-Agency Committee and TWG of the NEDA on the technical aspect of the census and rendered a monthly progress report to the Executive Director. It provided the overall direction of the activities of the different subcommittees on census. The two subcommittees created, the Sub-Committee on Population and Housing Census and the Sub-Committee on Operations and Logistics Support, were directly charged with the preparatory work for the census undertaking.

CENSUS BOARDS

A systematized involvement of government agencies and instrumentalities was made possible largely through the concerted efforts of the members of the National Census Coordinating Board (NCCB) and the Provincial, City and Municipal Census Boards. The national board was created by NEDA Memorandum Order No. 4-80, dated April, 1980 and the local boards, by Memo Order No. 5-80, dated April 1, 1980, by virtue of the powers vested in the Minister of Economic Planning under Section 3 of Presidential Decree No. 1200.

The NCCB was headed by the Minister of Economic Planning as Chairman with the Executive Director as Executive Officer. Named as members were the Ministers of Agriculture, Budget, Education and Culture, Finance, Human Settlements, Public Works, Justice, Labor, Local Government and Community Development, National Defense, Natural Resources, Public Highways, Public Information and Transportation and Communication. Rules and regulations necessary for the successful undertaking of the census were issued by the Board.

At the local government level, similar functions were carried out by the Provincial City and Municipal Census Boards. The Provincial Governor headed the Provincial Census Board while the Division Superintendent of Schools was Vice-chairman. Members were the Highway District Engineer, Provincial Auditor, Provincial Commander of the Philippine Constabulary, the Provincial Development Officer and the Provincial Agriculturist. The City Census Board was composed of the City Mayor as Chairman; City Superintendent of Schools, Vice-chairman; and the City Engineer, City Assessor and City Development Officer, members. Finally, the Municipal Census Board had for its Chairman the Municipal Mayor and ably assisted by the District Supervisor as Vice-chairman. The members were the Municipal Agriculturist, Station Commander, Municipal Treasurer and the Municipal Development Officer.

For each of these local census boards, the Provincial Census Officer, City Census Officer and the Municipal Census Officer were designated Executive Officer of their respective Board.

CENSUS ORGANIZATION

The overall direction and instructions for the census undertaking emanated from the Executive Director of the National Census and Statistics Office or in his absence, the Assistant Executive Director.

Assisted by the Task Force from the Central Office and in coordination with the local census boards, the Regional Census Officers and the Provincial Census Officers directly supervised the field operations in their respective areas. The services of District Supervisors, Head Teachers and elementary school teachers from public schools were utilized as City/Municipal Census Supervisors, Team Supervisors and Enumerators in that order.

During the field operations, the 1980 Census Operations Center under the overall supervision of the National Census and Household Surveys Department Chief, was the operating body that monitored the overall operations. Lending support to the center were the Administrative and Fiscal Services Staff.

METHOD OF ENUMERATION AND USE OF SAMPLING

The household was used as the enumeration unit and a complete listing of dwelling units, including vacant ones, was done.

A combination of complete enumeration and sampling was adopted. While all households were asked on the count of the population and housing characteristics, only twenty percent (20%) were asked on other characteristics. The selection of sample households was done systematically with a random start from a listing of households which was prepared simultaneously with the enumeration.

Using PH Form 2 (Common Private Household Questionnaire) and with an 80 percent coverage, the ifems asked on population were household membership, relationship to head, line number of mother, sex, date of birth, age as of last birthday and marital status. For the housing items, the type of building and the construction materials of roof and outer walls, number of rooms, floor area of the dwelling unit and the year the building was built were asked.

In addition to the population and housing items just mentioned, additional information were asked using PH Form 3 (Sample Private Household Questionnaire) from the 20 percent samples such as language or dialect generally spoken at home, citizenship, usual residence of mother at person's birth, residence of person in 1975, ability to speak Pilipino and English, school attendance, highest grade completed, literacy, economic activity of the person, place of schooling or work, fertility, nature of occupancy of the dwelling unit and housing facilities and conveniences.

Collective households were enumerated using PH Form 4, where the information asked were the same as those in PH Form 2, excluding housing items.

PLACE WHERE ENUMERATED

All persons were enumerated in their usual place of residence, which is the geographic place (street, barangay, sitio, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he usually sleeps; therefore, it may be the same as or different from the place where he was found at the time of the census.

POST ENUMERATION SURVEY

Originally the plan was to conduct a Post Enumeration Survey covering the whole country. For lack of funds the survey had to be confined to Metro Manila. Its purpose was to determine the extent of underenumeration or overenumeration in the 1980 Census of Population and Housing.

A sample of 132 barangays was selected. However, in 59 barangays which were divided into two or more enumeration areas (EAs), an enumeration area was chosen as sample.

A complete listing was made of households in the sample barangays/EAs using PH Form 1-B. Twenty percent of these households were selected as sample households and interviewed using PH Form 2, which was the same questionnaire used for non-sample households during the main enumeration. The housing portion of this form was disregarded.

CONTENT AND COVERAGE OF THE PUBLICATION

In this publication, the population and households were described according to the respective items listed below:

Population Items	Housing Items
Age Sex Marital Status	Type of Building Type of Occupancy Construction Materials of Roof and Outer Walls
Highest Grade Completed Literacy Language/Dialect Spoken in the Household Gainful and Non-Gainful Occupation Major and Minor Industry Migration	Year Built Floor Area of Dwelling Unit Tenure of Owner-Occupant with Respect to the Land Kind of Lighting Facilities Use and Source of Water Supply Type of Toilet Facilities Kind of Cooking Fuel Household Appliances

The above items are presented in the ten population tables and nine housing tables of this report.

Except for figures on total population and sex, all other characteristics were based on a 20 percent sample.

Aside from these published tables, 10 other tables on the above characteristics plus 6 statistical tables dealing on ever-married women 15 years old and over are also available to statistical users.

DEFINITION OF TERMS AND CONCEPTS

I - POPULATION

BARANGAY

A barangay is the smallest political unit in the country and generally its enumeration is

assigned to one enumerator. For enumeration purposes, a large barangay is usually split into parts and each part is called an enumeration area (EA).

ENUMERATION AREA

An enumeration area (EA) is a delineated area assigned to one enumerator, usually consisting of about 300 households. A barangay or part of a barangay may have been designated as an enumeration area.

URBAN AND RURAL AREAS

The same concepts used in the 1970 and the 1975 Censuses were followed in classifying areas as urban. According to these concepts, urbanized areas consist of:

- 1. In their entirety, all cities and municipalities having a population density of at least 1,000 persons per square kilometer.
- 2. Poblaciones or central districts of municipalities and cities which have a population density of at least 500 persons per square kilometer.
- 3. Poblaciones or central districts (not included in 1 and 2), regardless of the population size, which have the following:
 - a. Street pattern, i.e., network of streets in either parallel or right-angle orientation:
 - b. At least six establishments (commercial, manufacturing, recreational and/or personal services); and
 - c. At least three of the following:
 - 1) A town hall, church or chapel with religious services at least once a month;
 - 2) A public plaza, park or cemetery;
 - 3) A market place or building where trading activities are carried on at least once a week;
 - 4) A public building like a school, hospital, puericulture and health center or library.
- 4. Barangays having at least 1,000 inhabitants which meet the conditions set forth in 3 above, and where the occupation of the inhabitants is predominantly nonfarming or fishing.

All areas not falling under any of the above classifications are considered rural.

PERSONS ENUMERATED IN A PRIVATE HOUSEHOLD

The following were counted and enumerated as members of the household:

- Persons whose usual place of residence is the place where the household lives and present at the time of visit of the enumerator, except those born after 12:01 A.M., May 1, 1980;
- 2. Persons whose usual residence is the place where the enumerated household lives, but temporarily away at the time of enumeration, such as:
 - persons temporarily away on vacation, business or pleasure trip or any other purpose in the Philippines who are expected to be back within six months,

- or within one year, if abroad;
- b. students who usually go home to their respective households at least once a week;
- c. persons working elsewhere who usually go home to their respective households at least once a week;
- d. patients confined in hospitals for not more than six months at the time of enumeration of the household, except those confined (1) as inmates (not patients in wards for temporary confinement) in tuberculosis pavilions; (2) in mental hospitals; (3) in leprosaria or leper colonies; and (4) in rehabilitation centers for drug addicts;
- e. trainees in the Armed Forces of the Philippines, if their training is not more than six months:
- f. convicts and detainees in provincial or municipal/city jails or military camps, who have been confined for not more than 6 months at the time of enumeration of the household, except those who have been sentenced for more than 6 months (including those whose sentence is on appeal), even though just confined; and
- g. officers and crew members of coastal, interisland, or fishing vessels; officers and crew members of ocean-going vessels who usually go home to their household at least once a year.
- 3. Boarders of the household who are working, looking for work or studying, and who do not go home at least once a week;
- 4. Employees of household-operated enterprises who eat and sleep with the household and who do not go home at least once a week;
- 5. Persons (other than those in "3" and "4") whose usual place of residence is elsewhere, but who have been away from their usual place of residence for more than 6 months;
- 6. Members of the Armed Forces of the Philippines including draftees, sleeping most of the nights with the household, except those who only board or lodge with the household and who usually go home at least once a week; in such a case, they will be enumerated in their own household;
- 7. Persons found in the household who have no usual place of residence elsewhere;
- 8. Persons found in the household who are not certain of being enumerated elsewhere;
- 9. Persons who consider the dwelling unit of the household as their usual place of residence but are living within the premises of a foreign embassy, ministry, legation or consulate, including non-Filipino employees who have been residents of the Philippines before such employment;
- 10. Citizens of foreign countries and Filipinos (balikbayan) who have resided or expect to reside in the Philippines for more than one year from arrival;
- 11. Persons who sleep in the same dwelling unit but may not be able to take all or some of their meals with the household because of the nature of their work or other similar reason (they take their meals at place of work, etc.), should be considered as part of the household; and
- 12. A household member who is alive as of 12:01 A.M., May 1, 1980, but dies prior to the enumeration of the household.

PERSONS TOTALLY EXCLUDED FROM THE ENUMERATION

Totally excluded from the population count of the Philippines were:

- 1. Foreign ambassadors, ministers, consuls or other diplomatic representatives, and members of their households (except Filipino employees and non-Filipino employees who had been residents of the Philippines prior to said employment);
- 2. Citizens of foreign countries living within the premises of an embassy, legation, chancellory or consulate;
- 3. Officers and enlisted men of U.S. Military or Naval Forces and non-Filipino members of their households, irrespective of residence; foreigners who are civilian employees in U.S. military or naval stations and member of their families living within the premises of said stations or reservation; (Note: for foreigners who are civilian employees of said stations living outside the station or reservation, see Item 5).
- 4. Citizens of foreign countries who are Chiefs and officials of international organizations like UN, ILO or USAID, who are subject to reassignment to other countries after their tour of duty in the Philippines, and members of their families;
- 5. Citizens of foreign countries together with non-Filipino members of their families, who are students or who are employed, or have business in the Philippines and have been in the Philippines or expect to stay in the country for one year or less from arrival;
- 6. Citizens of foreign countries and Filipinos with usual place of residence in a foreign country, who are visiting in the Philippines and expect to stay in the country for one year or less from arrival (e.g. a balikbayan who will return to his usual place of residence abroad after a short vacation or visit in the Philippines);
- 7. Citizens of foreign countries in refugee camps/vessels; and
- 8. Residents of the Philippines on vacation, pleasure or business trip, etc. abroad, who have been away or expected to be away from the Philippines for more than one year from departure.

USUAL PLACE OF RESIDENCE

The term refers to the geographic place (street, sitio, barrio/barangay, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he sleeps most of the time; hence, it may be the same as or different from the place where he was found at the time of the census.

HOUSEHOLD

A household usually consists of a group of persons who sleep in the same dwelling unit and have common arrangements for the preparation and consumption of food. A person who lives alone is considered as one separate household. Although in most cases a household consists of a related family group, some household members may have no relationship to the central group. Boarders and servants, for instance are counted as part of a particular household if they take their meals with the household and sleep in the same dwelling unit. Persons who sleep with a household but individually cook their meals or eat elsewhere are each considered as single-person household.

Three generations may be living in one dwelling unit. If they are divided into two or more groups whose eating arrangements are independent from each other, each group is counted as a separate household.

PERSONS NOT LIVING IN HOUSEHOLD

Falling under this category are persons living in collective living quarters such as welfare institutions (orphanages and homes for the aged or infirm); penal and corrective institutions (jails, national penitentiary, and reformatory institutions); hospitals, sanatoria, leprosaria, and nurses homes; dormitories and boarding schools; lodging houses such as hotels, tourist homes and the like; military camps and others.

Most of these institutions house inmates for whom care or custody is provided by resident staff members, or persons residing in group quarters or in housing units on the institutional grounds.

Private families living within such institutions, however, are excluded from the classification, as well as persons (employees, students, etc.) who go home to their families on weekends or days off. Persons found in lodging houses, but who are on vacation or business trips and whose absence from home does not exceed six months on the day of enumeration, are likewise not counted as part of the institutional population.

RESPONDENT

A respondent is any responsible adult member of the household who furnished the information or answers to questions during the interview.

LANGUAGE/DIALECT GENERALLY SPOKEN IN THE HOUSEHOLD

This refers to the language or dialect spoken most of the time by members of the household. In cases where two or more languages/dialects are spoken by household members, the one most often used in conversations among members of the family of the head when most of them are gathered together is considered as the language/dialect generally spoken in the household.

HEAD OF HOUSEHOLD

The person responsible for the care and organization of the household is generally considered as the heaf of the household. He usually provides the chief source of income for the household.

In the case of a household consisting of two or more unrelated persons sharing a dwelling unit and sharing the same cooking facilities and meals, the head is usually the eldest male or female in the group regarded as such by the other members.

RELATIONSHIP TO HEAD OF HOUSEHOLD

This determines how each household member is related to the head, who is usually the husband or father, although in his absence or if incapacitated, the wife may be designated as head.

- 1. Spouse a woman/man married to and living with the head. This includes legal marriages as well as common-law relationships.
- Son/daughter the head's own child, stepchild, or adopted child.

- 3. Son-in-law/daughter-in-law refers to a household member related to the head by marriage to his daughter or son.
- 4. Grandson/granddaughter child of the son or daughter of the head.
- 5. Other relative a household member related to the head by blood, marriage, or adoption. Father, mother, aunts, nephews, parents-in-law and cousins are examples.
- 6. Others any person in the household who is usually a non-relative of the head. Boarders and servants fall under this category. Certain members of the household who are related to the head by blood or affinity, but are actually boarders or servants in the household, are classified under "Others".

For collective households and group quarters, the question on relationship refers to the person's relationship to the institution or establishment, and not to the person recorded as head.

AGE AND DATE OF BIRTH

Data on the age of the population were obtained by asking the respondent the month and year of birth and the age itself of the household member before May 1, 1980. To ensure accuracy, a conversion table on age before May 1, 1980 was prepared for the use of enumerators, editors/coders and verifiers.

MARITAL STATUS

This refers to the civil status of all persons 10 years old and over. A person in this age group is classified as single, married, widowed, separated or divorced, or civil status unknown, based on the following definitions:

- a. Single If never been married.
- b. Married Legally married or living consensually with husband/wife without benefit of a legal marriage. A person classified as "married" includes one who remarried after having been widowed, separated or divorced or one temporarily separated from spouse owing to the nature of work, illness or service in the Armed Forces.
- c. Widowed A person whose spouse died and who has not remarried at the time of enumeration.
- d. Separated —If permanently separated from spouse either legally or otherwise, due to marital discord.
- e. Divorced If bond of matrimony has been dissolved through a court decree and is therefore free to remarry.
- f. Unknown If civil or marital status is either not known to the respondent, or the respondent himself refuses to reveal the marital status of such person.

CITIZENSHIP

Citizenship is defined as the legal nationality of a person. A citizen is a legal national of the country of the census; an alien is a non-national of the country.

LITERACY

A person is considered literate if he is able to read and write a simple message in any language or dialect.

HIGHEST GRADE COMPLETED

This has reference to the specific grade or year completed in elementary school, high school, college or university, by persons 7 years of age and over. Academic degree holders are classified according to the title of the degree received or the major field of study undertaken.

USUAL OCCUPATION

This refers to the specific job or kind of work that a person, who works most of the year, is usually pursuing, or if unemployed at the time of enumeration, it is the kind of work he used to do most of the year. A person is considered as usually working most of the year if he works for at least 10 hours a week for 26 weeks either for pay in cash or in kind, for a fee or profit in own farm, business or establishment or practice of a profession and without pay on family farm or enterprise. This particular group of workers is referred to as gainful workers.

For persons who do not work most of the year, the usual occupation relates to the non-gainful activities they usually do most of the year. Among such persons are housekeepers, students, pensioners, retired and disabled. However, a person who is housekeeping or schooling and also works in a gainful activity was reported as gainfully employed, even if more time was spent housekeeping or studying, as the case may be.

INDUSTRY

Industry refers to the specific character and nature of business or industry or the place where the work is being performed in connection with the job or occupation reported for a person.

EVER-MARRIED WOMAN

This refers to a woman who has already entered married life. Marriage here may either be legal or consensual union. At the time of enumeration the ever-married woman may still be married, or already widowed, separated or divorced.

II - HOUSING

BUILDING

A building is any independent free-standing structure comprising one or more rooms or other spaces, covered by a roof and enclosed within external walls or dividing walls with adjacent building which usually extend from the foundation to the roof. It usually contains one or more rooms internally connected with one another. A building therefore, is any structure intended for dwelling, storage, factory, shelter or for some other useful purposes.

For purposes of the 1980 Census of Population and Housing, only the following buildings were listed and assigned building serial numbers:

- a. A house or any kind of building or shelter where people were actually living;
- b. A residential building (house, apartment or accesoria, condominium) that was vacant;

- c. Hotel, motel, lodging house, dormitory or camp (construction, logging, mining, etc.) in operation;
- d. A commercial, office, industrial, agricultural or other kinds of buildings with one or more dwelling units (containing a kitchen/kitchen-dining room, living room and a bedroom, and with separate entrance) which were all vacant.

The different types of buildings are:

- 1. Single house a complete structure intended for one household. It includes the so-called "nipa hut" or a small house that is built as a more or less permanent dwelling unit.
- 2. Duplex a structure intended for two households, with complete living facilities for each. It is divided either vertically or horizontally into two separate dwelling units which are usually identical.
- 3. Apartment/accesoria/condominium/row house

An apartment is a structure usually of several stories, made up of three or more independent entrances from internal halls or courts. It differs from an accesoria in that an apartment has one common entrance from the outside.

An accesoria is usually a one or two-floor structure divided into three or more dwelling units, each dwelling unit having its own separate entrance from the outside. Another name for accesoria is row house.

A condominium is usually a high-rise building where the dwelling units are owned individually but the land and other areas and facilities are owned in common.

- 4. Improvised (barong-barong) a makeshift or roughly constructed house usually built with salvaged materials.
- 5. Commercial/industrial/agricultural buildings not intended for human habitation but used as dwelling units at the time of the census.
 - Commercial a building used for transacting business or rendering professional services, such as a storage or an office building.
 - Industrial a building used for processing, assembling, fabricating, finishing, manufacturing or packaging operations, such as a factory or a plant.
 - Agricultural any structure used for agricultural purposes, such as a barn, warehouse, rice mill, etc.
- 6. Other housing unit (natural shelter, boat, etc.)
 - This refers to living quarters which are not intended for human habitation nor located in permanent buildings but which are, nevertheless, used as living quarters at the time of the census. Caves, other natural shelters and mobile housing units such as trailer, barge, boat, etc., fall within this category.
- 7. Hotel, lodging house, dormitory, etc. This group comprises permanent structures which provide lodging and/or meals on fee basis. Hotels, motels, inns, boarding houses, dormitories, pensions and lodging houses fall within this category.
- 8. Institutional (hospital/convent/school dormitory/penal institution, etc.) a building intended for persons confined to receive medical, charitable, or other care treatment such as jails and penal colonies, and other buildings like convents, school dormitories, etc.
- 9. Other collective living quarters any structure or shelter which does not fall under items 7 and 8. Included in this category are camps which are defined sets of

premises originally intended for the temporary accommodation of persons with common activities or interests like military camps, and other camps established for the housing of workers in mining, agriculture, public works or other types of enterprises.

DWELLING UNIT

A dwelling unit is a separate and independent place of abode intended for habitation by one household, or one not intended for habitation but occupied as living quarters by a household at the time of the census.

Dwelling units counted included those that are occupied and those that are unoccupied.

CONSTRUCTION MATERIALS OF ROOF

The kinds of materials used are as follows:

- 1. Galvanized iron/aluminum
- 2. Tile/concrete/brick/stone
- 3. Asbestos
- 4. Cogon/nipa
- 5. Makeshift/salvaged materials
- 6. Others (anahaw, etc.)

CONSTRUCTION MATERIALS OF OUTER WALLS

The kinds of materials may be any of the following:

- 1. Galvanized iron/aluminum
- 2. Tile/concrete/brick/stone
- 3. Wood/plywood
- 4. Mixed tile/concrete/brick/stone and wood/plywood
- 5. Asbestos
- 6. Bamboo/sawali
- 7. Cogon/nipa
- 8. Makeshift/salvaged materials
- 9. Others (anahaw, etc.)

If the roof or outer walls are constructed of two or more materials the material most used was reported.

YEAR BUILDING WAS BUILT

This refers to the year when the extent of construction permitted occupancy for living purposes. The year reported was the particular year when the occupancy started or when the building was fit for occupancy even if not occupied.

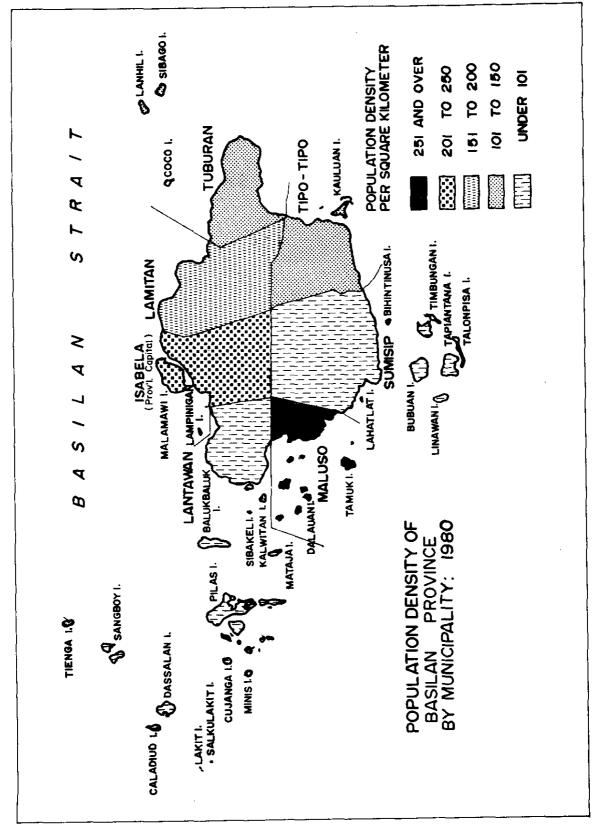

NUMBER OF ROOMS IN THE DWELLING UNIT

A room is defined as a space in a dwelling unit or other living quarters enclosed by walls reaching from the floor to the ceiling or roof covering, or at least to a height of 1.8 meters which are of permanent or semi-permanent structure, of a size large enough to hold a bed for an adult or at least has an area of 3 square meters.

The total number of rooms reported included the bedrooms, dining room, living room, kitchen, roofed veranda, library or music room and other separate spaces used or intended for dwelling purposes, as long as they meet the criteria of walls and floor space. Passageways, lobbies, bathrooms and toilets or rooms used exclusively as store/shop/clinic/grains storage (nobody sleeps therein) were not counted as rooms even if they meet the criteria.

FLOOR AREA OF DWELLING UNIT

This refers to the space enclosed by the exterior walls of the dwelling unit, or the space measured inside the outer walls of the spaces that are counted as rooms. In case of several floors, the area of each floor in square meters was taken and added together to get the total floor area of the dwelling unit. Areas of floor spaces that are not considered rooms such as bathroom, toilet, storeroom, passageway were excluded in determining the floor area.

Basilan: A Brief Analysis

Basilan, formerly a part of Zamboanga del Sur, was created as a separate province on December 27, 1973 by virtue of Presidential Decree No. 356. It is located across the southern tip of Zamboanga del Sur and is bounded on the north by the Basilan Strait, on the east by the Moro Gulf and on the west by the Sulu Sea. The provincial terrain is rough especially along its central part.

The second smallest among the five provinces that comprise Region IX, Basilan has a total land area of 1,327.2 square kilometers, representing 0.44 percent of the country's total land area. Seven municipalities comprise the province of Basilan with Isabela as its capital.

POPULATION

As reported in the 1980 census, Basilan had a total population of 201,407 inhabitants, 101,481 of which are males and 99,926 are females. In terms of population size, the province ranked number 60 among the 73 provinces of the country. Its population density moved up considerably from 128.9 in 1975 to 151.8, or an increase of 22.9 persons per square kilometer within a span of five years. Its annual growth rate, placed at 3.32 percent, showed a slight decrease of 0.21 percentage point since May 1, 1975.

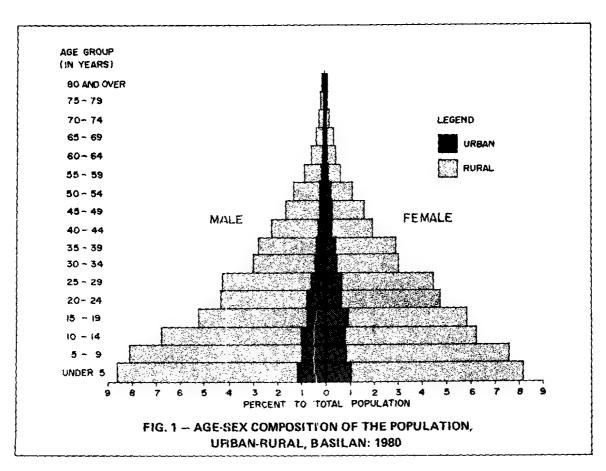

Basilan is still predominantly rural with 85.73 percent of the total population compared to only 14.27 percent of the population living in the urban areas. However, it is interesting to note that the proportion of urban dwellers have steadily hiked over the three censal periods — from 9.98 percent in 1970 to 13.71 percent in 1975, and further moving up to 14.27 percent in 1980. Consequently, the rural population declined from 90.02 percent in 1970 to 86.29 percent in 1975 and finally to 85.73 percent in 1980.

A comparative breakdown of the population classified according to urban-rural residence and sex is shown in Table A.

A BRIEF ANALYSIS

TABLE A – URBAN-RURAL POPULATION BY SEX,
BASILAN: 1970, 1975 AND 1980

Area Classification	1980		1975		1970	
and Sex	Number	Percent	Number	Percent	Number	Percent
Total	201,407	100.00	171,027	100.00	143,829	100.00
Male	101,481	50.39	87,415	51.11	72,067	50.11
Female	99,926	49.61	83,612	48.89	71,762	49.89
Urban	28,749	14.27	23,444	13.71	14,358	9.98
Male	14,337	7.12	12,106	7.08	6,992	4.86
Female	14,412	7.15	11,338	6.63	7,366	5.12
Rural	172,658	85.73	147,583	86.29	129,471	90.02
Male	87,144	43.27	75,309	44.03	65,075	45.25
Female	85,514	42.46	72,274	42.26	64,396	44.77

The sex ratio (number of males for every 100 females) of the province dropped from 104.55 in 1975 to 101.56 in 1980. There are more males than females in the rural areas (101.91) than in the urban areas where there are only 99.48 males for every 100 females.

The population pyramid for the rural male and female population tends to follow an expansive profile of the age-sex distribution. A large number of the rural male and female population are under 5 years of age. From this age group through the 80 years old and above, the population (male and female) respectively decrease as each age group grows older, thus a pyramid-like structure is formed. On the other hand, the urban male and female population deviate from the usual pyramid-shape. Among the urban males, the 10-14 years of age outnumber the 5-9 years old and the 15-19 years old, by those 20-24, while among the urban females the 15-19 years of age outnumber those belonging to any of the younger age groups (Table 2).

AGE COMPOSITION

More than half (52.85%) of the total population of Basilan comprised the 15-64 age group; the 0-14 year olds, 45.49 percent and the 65 years and over, 1.66 percent. An increasing trend is noted for the productive age group (15-64): from 49.59 percent in 1970, it increased by 2.68 and 0.58 percentage points in 1975 and 1980, respectively. On the other hand, the reverse was true for the 0-14 age group: a decrease of 2.72 percentage points was observed between 1970 and 1975 and 0.45 percentage point between 1975 and 1980. No significant changes were noted among the 65 years and over age bracket.

Below are comparative figures showing the age composition of the population in three censal years:

TABLE B – AGE COMPOSITION OF THE POPULATION, BASILAN: 1970, 1975 AND 1980

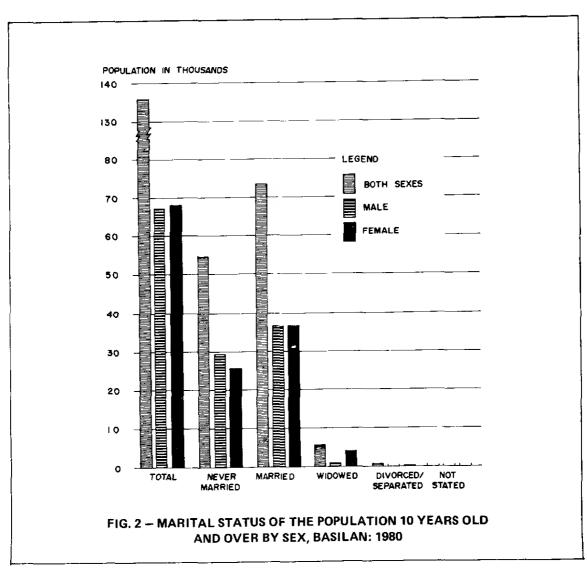

Age	1980		19	1975		1970	
Composition	Number	Percent	Number	Percent	Number	Percent	
Total	201,407	100.00	171,027	100.00	143,829	100.00	
0 - 14 years	91,627	45.49	78,576	45,94	69,993	48.66	
15 - 64 years	106,447	52.85	89,387	52.27	71,324	49.59	
65 years and over	3,333	1.66	3,064	1,79	2,512	1.75	

With an increased percentage of persons in the productive ages, the dependency ratio (number of dependents for every 100 persons in the productive age group) dropped from 91.33 in 1975 to 89.21 in 1980. More dependents are found among the males (48.27%) than among the females (46.01%). The urban dependency ratio is markedly lower than the rural ratio, 76.68 for the former and 91.47 for the latter. Of the total urban population, 40.93 percent are below 15 years old, 56.60 percent are within the productive age bracket and only 2.47 percent, 65 years and over. Comparatively, 46.25 percent of the rural residents are 0-14 years old; 52.23 percent, 15-64 and 1.52 percent, 65 years and over (Table 3).

The median age of the population was 16 years; half of the population were below 16 years old and the other half, above this age.

MARITAL STATUS

In the three censal periods, married individuals had the highest proportion of the population 10 years old and over than any of the other marital status categories. While a decline occurred from 1970 to 1975 by 0.57 percentage point, a sudden upsurge of about 5.49 percentage points occurred between 1975 and 1980 bringing up the proportion to 54.26 percent. The never married followed with 40.71 percent, a decrease of 6.55 and 5.33 percentage points from the 1975 and 1970 proportions, respectively. A moderate increase of 0.91 percentage point was noted in the proportion of the widowed population over the past five years. Slight increases were observed in the proportions of persons in the divorced or separated (0.12 percentage point) and not stated (0.03 percentage point) categories.

More than half of the urban (51.09%) as well as the rural (54.82%) population were married. Of the rural population, 40.02 percent constituted the never married persons, while their urban counterparts made up 44.59 percent.

Approximately 54.13 percent of the male population 10 years old and over were married, 6.38 percentage points higher than the 1975 proportion. In contrast, the proportion of never married males decreased from 50.17 percent in 1975 to 43.37 percent in 1980. The proportion of widowed males, however, slightly increased by 0.31 percentage point while that of the divorced or separated gained 0.08 percentage point. Among the females, 54.39 percent were married, following a 4.56 percentage points increase in their proportion in 1975. The proportion of never married females, on the other hand, declined from 44.24 percent to 38.06 percent. However, the proportions of widowed and divorced or separated persons increased by 1.46 and 0.14 percentage points, respectively (Table 4).

The succeeding table shows the classification of the population 10 years old and over by sex and marital status:

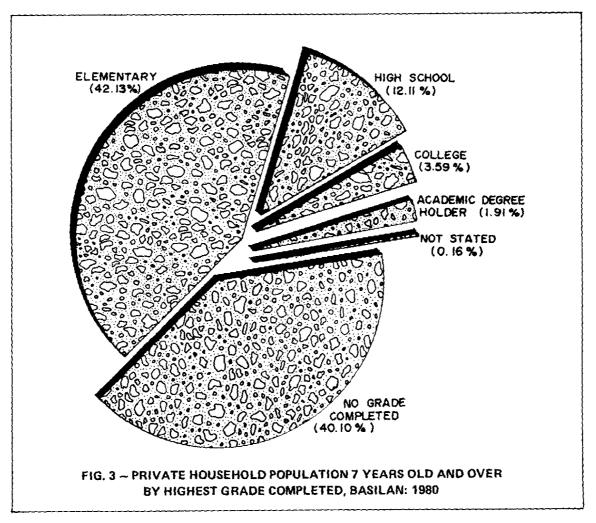

TABLE C - POPULATION 10 YEARS OLD AND OVER BY SEX AND MARITAL STATUS, BASILAN: 1970, 1975 AND 1980

Sex and	1980		1975		1970	
Marital Status	Number	Percent	Number	Percent	Number	Percent
Both Sexes	136,030	100.00	116,341	100.00	93,875	100.00
Never married	55,378	40.71	54,980	47.26	43,224	46.04
Married	73,806	54.26	56,741	48.77	46,315	49.34
Widowed	5,762	4.23	3,861	3.32	3,327	3.54
Divorced/separated	1,016	0.75	732	0.63	824	0.88
Not stated	68	0.05	27	0.02	185	0.20
Male	<u>67,904</u>	100.00	59,184	100.00	46,778	100.00
Never married	29,448	43.37	29,692	50.17	22,901	48.96
Married	36,756	54.13	28,262	47.75	22,612	48.34
Widowed	1,333	1.96	979	1.65	885	1.89

Not stated	30	0.04	10	0.02	78	0.17

HIGHEST GRADE COMPLETED

Those who completed the elementary grade had the highest proportion among private household population seven years old and over in 1980, thus displacing those with no grade completed in 1975. Persons with at least a year in the elementary level comprised 42.13 percent compared to 36.50 percent in 1975. On the other hand, those with no grade completed constituted 40.10 percent and 46.63 percent in 1980 and 1975, respectively. Those who reached the secondary and collegiate levels increased by 1.71 and 0.84 percentage points, respectively. Academic degree holders likewise rose by 0.74 percentage point, accounting for 1.91 percent. The proportion of persons who did not disclose their highest grade completed went down from 2.55 percent in 1975 to as low as 0.16 percent in 1980.

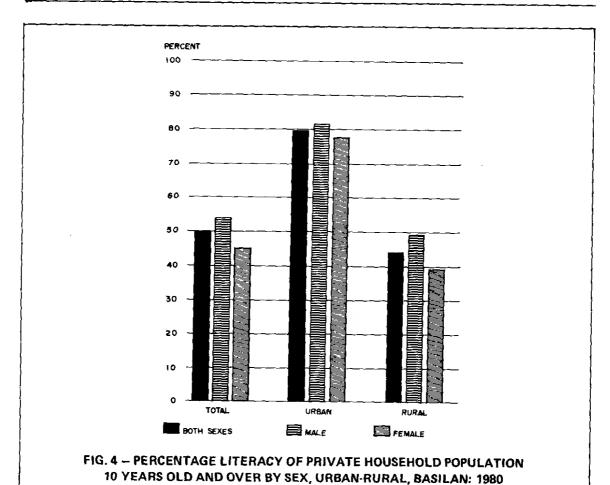

Of those who had elementary training, only 26.92 percent graduated from the sixth or seventh grade. Nearly forty-five percent (44.31%) did not go beyond the third grade; 16.64 percent attained the fourth grade and 12.13 percent finished fifth grade. Among those with secondary education, 71.52 percent reached anywhere from the first to third year while only 28.48 percent graduated from fourth year. Majority (86.21%) of the college undergraduates finished the lower collegiate years and only 13.79 percent completed the fourth or higher year (Table 5).

The distribution of the private household population according to highest grade completed in the last two censal years is shown in the accompanying table:

TABLE D -- PRIVATE HOUSEHOLD POPULATION 7 YEARS OLD AND OVER BY HIGHEST GRADE COMPLETED, BASILAN: 1975 AND 1980

Highest Grade Completed	15	980	1975		
Tuguest Grade Completed	Number	Percent	Number	Percent	
Total	<u>154,711</u>	100.00	<u>133,199</u>	100.00	
No grade completed	62,041	40.10	62,113	46.63	
Elementary	65,173	42.13	48,616	36.50	
High school	18,738	12.11	13,855	10.40	
College	5,562	3.59	3,666	2.75	
Academic degree holder	2,956	1.91	1,555	1.17	
Not stated	241	0.16	3,394	2.55	

LITERACY

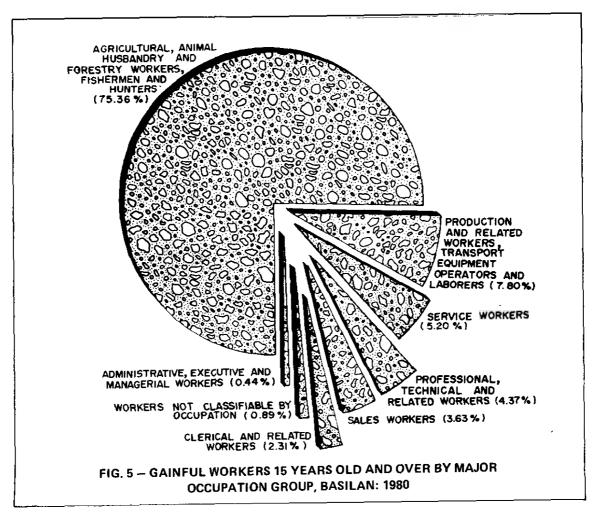

Basilan had a very low literacy rate with only 49.66 percent of the private household population aged 10 and over able to read and write. More males (54.00%) than females (45.37%) were literates. Moreover, in the urban areas the males registered a higher rate of literacy (81.63%) than their female counterparts (77.84%). Likewise, in the rural areas a higher literacy rate was reported among the males (49.20%) than among the females (39.49%).

LANGUAGE OR DIALECT

More than 34 languages and dialects are spoken by the 37,116 total number of private households. Nearly a third (32.01%) of the households speak Yakan, followed by 25.02 percent speaking Sulu-Moro (Tausog). Chavacano and Samal are spoken by 15.37 percent and 12.99 percent, respectively. Only 10.98 percent speak Cebuano while the rest use other languages or dialects as their medium of communication.

GAINFUL OCCUPATION

Gainful workers comprise 47.73 percent of the total private household population 15 years old and over. The number of gainful workers increased to 52,136 from 43,097 in 1975. Agricultural, animal husbandry and forestry workers, fishermen and hunters, with

75.36 percent in 1980 and 74.10 percent in 1975, consistently formed the biggest group of gainful workers. The proportion of production and related workers, transport equipment operators and laborers decreased from 8.43 percent in 1975 to 7.80 percent. Service workers, now third in rank, went up by 0.64 percentage point to 5.20 percent, displacing sales workers which substantially declined from 5.84 percent in 1975 to 3.63 percent in 1980. Professional, technical and related workers, at 4.37 percent, gained 1.60 percentage points. While clerical workers have likewise grown from 1.74 percent to 2.31 percent; administrative, executive and managerial workers gained just a mere 0.02 percentage point over the 1975 proportion. A marked decrease in the proportion of workers not classifiable by occupation was noted (Table 8).

Changes in the proportion of workers engaged in various occupations from 1975 to 1980 are reflected in the following table:

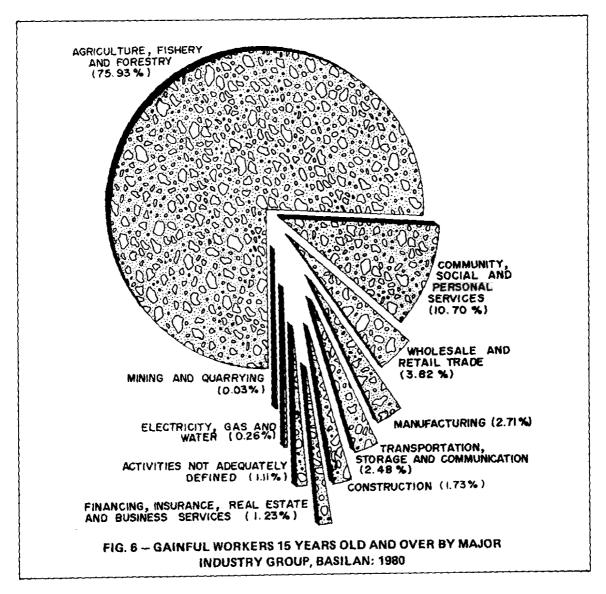

TABLE E - GAINFUL WORKERS 15 YEARS OLD AND OVER BY MAJOR OCCUPATION GROUP, BASILAN: 1975 AND 1980

	1	980	1975		
Major Occupation Group -	Number	Percent	Number	Percent	
Total	52,136	100.00	<u>43,097</u>	100.00	
Professional, technical and related workers	2,281	4.37	1,195	2.77	
Administrative, executive and managerial services	232	0.44	179	0.42	
Clerical and related workers	1,203	2.31	751	1.74	
Sales workers	1,891	3.63	2,515	5.84	
Service workers	2,710	5.20	1,965	4.56	
Agricultural, animal husbandry and forestry workers, fisher- men and hunters	39,289	75.36	31,933	74.10	
Production and related workers, transport equipment operators and laborers	4,067	7.80	3,635	8.43	
Workers not classifiable by occupation	463	0.89	924	2.14	

INDUSTRY

Agriculture, fishery and forestry, the dominant industry group in Basilan, provides means of livelihood to 75.93 percent of the total gainful workers 15 years old and over. Majority of the agricultural workers derive their income from agricultural crop production (69.20%) and nearly thirty percent, from fishery (29.70%). Community, social and personal

services, the second biggest industry group, employ 10.70 percent of the gainful workers whose three principal concentrations are in education services (29.53%), public administration and defense (31.01%) and personal and household services (26.73%). Wholesale and retail trade ranks third with 3.82 percent, the retail trade being the contributor of 88.81 percent workers. Manufacturing contributes 2.71 percent; transportation, storage and communication, 2.48 percent; construction, 1.73 percent and financing, insurance, real estate and business services, 1.23 percent. Electricity, gas and water barely contribute 0.26 percent; mining and quarrying, 0.03 percent and activities not adequately defined, 1.11 percent (Table 9).

MIGRATION

Out of 167,045 private household persons 5 years old and over, 95.57 percent were residents of the same municipality on May 1, 1975 and on May 1, 1980. Of those whose place of residence on May 1, 1975 was different from that on May 1, 1980, 2.82 percent

moved to another municipality within their home province while 1.55 percent moved outside provincial boundaries. Only a small proportion of the population were residing in foreign countries (0.06%). In two migratory movements, there were more males than females — greater by only 0.08 percentage point in the inter-municipality migration within the province and by a mere 0.07 percentage point among migrants from other provinces. Among former residents in foreign lands, the males and females had the same proportions (0.03%). It was observed that in the first two movements, majority moved to rural areas (Table 10).

TYPE OF BUILDING

Most (94.90%) of the 37,116 households of Basilan are occupying single houses. Others live in duplex (2.93%), apartment/accesoria/condominium/row house/etc. (1.13%), improvised structures such as barong-barong (0.46%), commercial/industrial/agricultural buildings (0.21%), and other housing unit such as natural shelter, boat, etc. (0.13%). A negligible proportion (0.01%) of households live in institutional buildings like hospital, convent, school dormitory, etc., while 0.23 percent live in other collective living quarters (military camp, etc.).

Majority (87.93%) of the households living in single houses are found in the rural areas while only 12.07 percent are in the urban areas. On the other hand, more duplex (52.48%) and commercial/industrial/agricultural building residents (87.18%) are from the urban areas. Approximately 47.52 percent and 12.82 percent of the households in the respective structures are found in the rural areas. Surprisingly, 86.36 percent of the households in apartment/accesoria/condominium/row house are in the rural areas and as expected, majority (60.95%) of those residing in improvised structures are from the same area (Table 1).

TABLE F -- NUMBER OF HOUSEHOLDS IN OCCUPIED DWELLING UNITS BY TYPE OF BUILDING, BASILAN: 1980

Type of Building	198	80
Type of Building	Number	Percent
Total	<u>37,116</u>	100.00
Single house	35,224	94.90
Duplex	1,088	2.93
Apartment/accesoria/condominium/	•	• • • • • • • • • • • • • • • • • • • •
row house/etc.	418	1.13
Improvised (barong-barong)	169	0.46
Commercial/industrial/agricultural	78	0.21
Other housing unit: natural shelter,		V.= 1
boat, etc.	49	0.13
Hotel, lodging house, dormitory, etc.	_	~
Institutional (hospital, convent, school		
dormitory, etc.)	5	0.01
Other collective living quarters (military	-	0.01
camp, etc.)	85	0.23

TYPE OF OCCUPANCY

Table 1 also shows that 80.44 percent of the total households are owners of their dwelling units. The rest of the households are either tenants/lessees (5.16%), subtenants/sublessees (0.49%) or rent-free occupants (13.91%).

Among the rural households, 81.41 percent own the dwelling units they are residing in, while in the urban areas, 74.26 percent are owner-occupants. Tenants/lessees and free renters are found with almost equal proportions in the urban areas (13.15% for the former and 12.13% for the latter). Among the rural households, only 3.91 percent are tenants/lessees while 14.19 percent are rent-free occupants.

CONSTRUCTION MATERIALS OF ROOF AND OUTER WALLS

Most of the households in Basilan are occupying dwelling units constructed with roofs of light materials, such as cogon/nipa, makeshift/salvaged materials and others, like anahaw (78.24%). The remaining 21.76 percent have roofs of strong materials such as galvanized iron/aluminum, tile/concrete/brick/stone and asbestos. Households in dwelling units roofed with strong materials are more common in the urban areas (54.36%) than households in units with roofs of light materials (45.64%). On the other hand, majority of the rural households live in dwelling units roofed with light materials (83.34%), while only 16.66 percent are occupying units made with roofs of strong materials.

By type of construction materials of outer walls, majority of the households have dwelling units (55.15%) built with walls of light materials and 44.85 percent, of strong materials. Most of the households in the urban areas (79.90%) have dwelling units built with walls of strong materials while 20.10 percent, of light materials. On the other hand, majority of the rural households (60.63%) are still in units made with walls of light materials and the rest (39.37%) are occupying units built with walls of strong materials (Table 2).

YEAR BUILT

Nearly two-thirds or 65.28 percent of the total households are occupants of structures built between 1976 and 1980; 16.51 percent, during 1971-1975; 11.57 percent live in buildings erected in 1961-1970 and 4.78 percent, 1951-1960. Only 1.51 percent occupy structures built during 1942-1950 and a mere 0.35 percent, before the Second World War (Table 2).

FLOOR AREA OF DWELLING UNIT

Majority of the households (72.55%) in Basilan occupy dwelling units with floor area of less than 30 square meters. About 18.96 percent live in 30-49 square-meter dwelling units; 4.02 percent dwell in 50-69 square-meter dwelling units and 2.19 percent, in 70-99 square-meter units. Only 2.28 percent have spacious dwelling units from 100 square meters and over (Table 3).

TENURE OF OWNER-OCCUPANT WITH RESPECT TO THE LAND

Of the 29,858 households owning their dwelling units, almost half or 49.07 percent also own the land where the structures are erected. The rest are distributed as follows: 9.87 percent are either lessee or sublessee; 4.29 percent, farm lessee/agricultural tenant of landowner and 7.92 percent, with other legal tenure. Still a large number of dwelling unit owners (28.85 percent) have no tenure on the land such as squatters, etc. (Table 4).

SOURCE AND USE OF WATER SUPPLY

More than half of the households in the province depend mainly on dug well than on any other source of water supply whether for drinking (57.02%), for kitchen use (56.39%) or for laundry purposes (50.41%). For drinking, 22.78 percent depend on faucet, community water system; 8.23 percent, spring; 3.93 percent, tubed/piped shallow well and 2.76 percent, tubed/piped deep well. Only 0.03 percent reported rain as their source of drinking water. Nearly the same proportions of households get water from these sources for kitchen use: 21.17 percent, faucet, community water system; 8.95 percent, spring; 3.65 percent, tubed/piped shallow well; 2.80 percent, tubed/piped deep well and 0.04, rain. For laundry purposes, about 20.17 percent use water from faucet, community water system; 8.19 percent, from spring; 2.62 percent, from tubed/piped deep well; 2.44 percent, tubed/piped shallow well and 0.03 percent, rain. A few households reported lake, river and stream as their source of drinking supply (5.25%) and for kitchen use (7.00%), but a large number of households reported these sources mainly for washing clothes (16.14%).

KIND OF LIGHTING FACILITIES

The government's massive electrification program is not yet fully implemented in Basilan so that a large number of households (80.33%) still use kerosene for lighting compared to 15.16 percent users of electricity. The rest of the households use either liquefied petroleum gas (2.28%), oil (0.92%) or others, like candle (1.31%). However, majority (54.16%) of the urban dwellers use electricity for lighting; 42.35 percent use kerosene; 2.73 percent are liquefied petroleum gas users; only 0.10 percent use oil and 0.66 percent other kind like candle. On the other hand, users of kerosene in the rural areas are still predominant with 86.27 percent households utilizing it, while only 9.06 percent households use electricity for lighting purposes. About 2.22 percent use liquefied petroleum gas; 1.04 percent are oil users and 1.41 percent, other kind such as candle, etc. (Table 5).

COOKING FUEL

Wood or charcoal is commonly used for cooking by residents of Basilan. More than four-fifths of the total number of households (82.46%) use wood or charcoal for cooking compared to users of kerosene (10.89%). Households using liquefied petroleum gas comprise 1.13 percent; electricity, 0.64 percent and other kind of cooking fuel, 4.88 percent. In both urban and rural areas, the predominant use of wood or charcoal is observed – 89.78 percent of the total urban households and 81.32 percent of the total rural households. About 2.45 percent of the urban households use electricity; 2.71 percent, liquefied petroleum gas; 4.04 percent, kerosene and other kind, 1.02 percent. Among rural households, 0.36 percent utilize electricity; 0.88 percent, liquefied petroleum gas; 11.96 percent, kerosene and 5.48 percent, other kind.

TOILET FACILITIES

The open-pit type is the most common toilet facility in the province with 29.98 percent of the total households using it. Only 8.49 percent use water-sealed with sewer/septic tank and 3.61 percent water-sealed with other depository. More than a fifth (20.94%) use closed pit (antipolo, etc.) while 6.98 percent use other type like the pail system. Thirty percent do not have any toilet facility at all. Urban households have better toilet facilities than their rural counterparts. More than forty percent of the urban

households use the water-sealed, sewer/septic tank (28.01%) and water-sealed with other depository (13.56%). More than a fourth (27.25%) use closed pit (antipolo, etc.) and the open pit type (25.68%). Only 0.38 percent use other type like the pail system and 5.12 percent do not have any toilet facility. Among the rural households, nearly a third (30.65%) of the households still use open pit and 19.96 percent use closed pit (antipolo). Only 5.44 percent of households use water-sealed with sewer/septic tank and barely 2.05 percent, water-sealed with other depository. A few use other type like the pail system (8.01%) while a large proportion (33.89%) have no toilet facilities at all (Table 7).

OWNERSHIP OF RADIO, TELEVISION SET AND REFRIGERATOR/FREEZER

About one-half (50.15%) of the households in Basilan have radios, 3.48 percent own television sets and 3.76 percent possess refrigerators or freezers. In the urban areas, majority (72.29%) of the households have radios, 14.82 percent own television sets and 15.80 percent possess refrigerators or freezers. Among the rural households, 46.68 percent own radios, only 1.71 percent have television sets and 1.88 percent, refrigerators or freezers (Table 9).
